Vinum Design is Nevada's brand dedicated to freestanding wine cellars, created to transform every bottle into a unique sensory experience. Each product embodies the perfect balance of technological innovation, artisanal care, and contemporary design, engineered to ensure optimal temperature and humidity conditions while enhancing the pleasure of tasting.

Vinum Design solutions blend seamlessly into both domestic and professional environments, becoming refined furnishing elements and essential tools for the Ho.Re. Ca. sector. Outstanding build quality, meticulous attention to detail, and cutting-edge technologies make the brand the ideal choice for those seeking elegance and high performance.

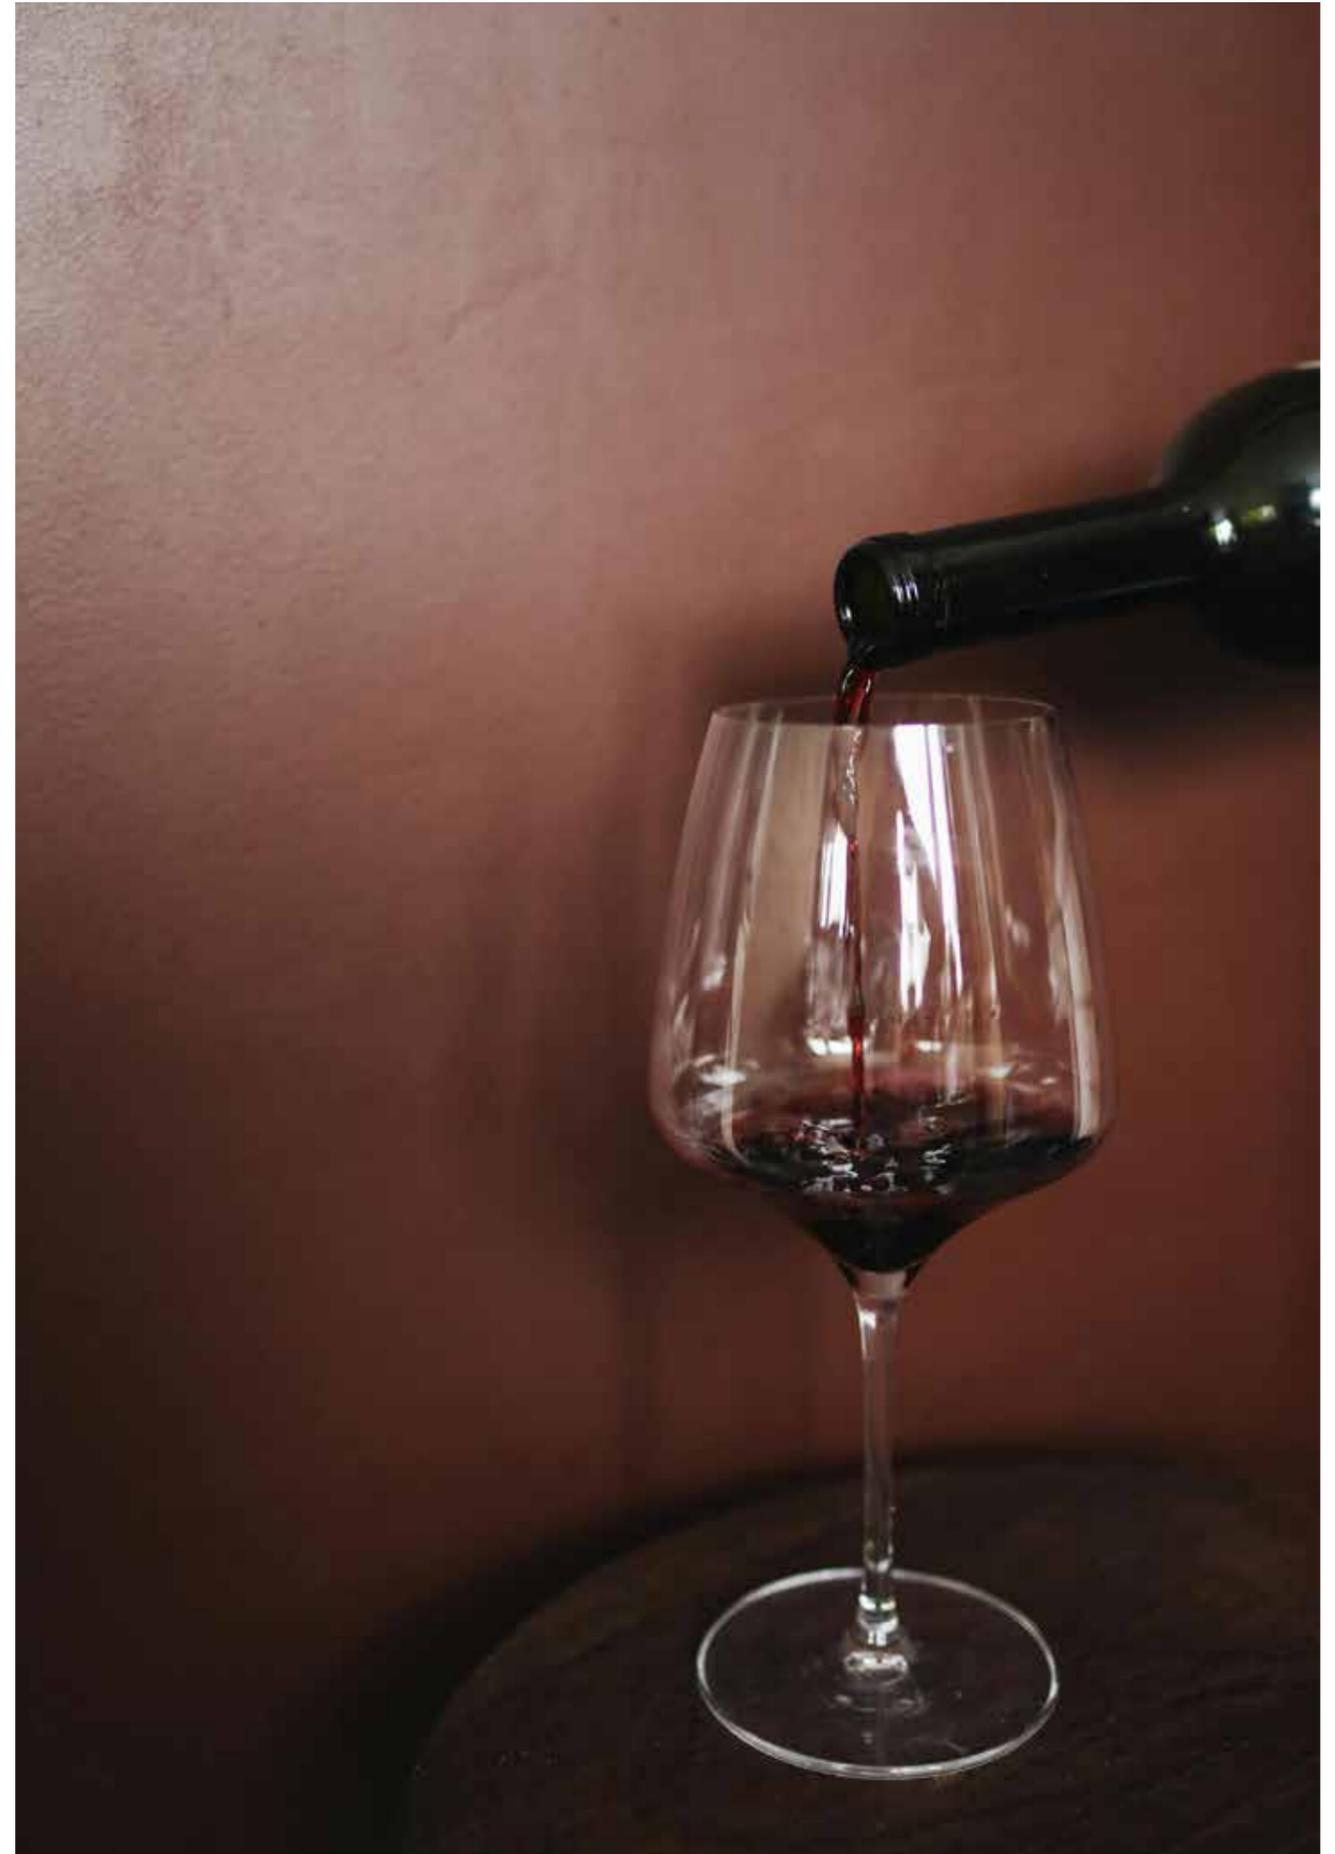

Each model undergoes rigorous quality controls, is covered by a 2-year warranty, and is supported by a qualified service team. It is a reliable, long-lasting investment that reflects a true passion for wine and its culture.

OUR PHILOSOPHY

L'impegno di Vinum Design è creare soluzioni che permettano di vivere e condividere il proprio spazio in un ambiente elegante e armonioso, capace di trasmettere emozioni a sé stessi, ai propri familiari e agli ospiti.

Il nostro sogno va oltre la semplice produzione e vendita: vogliamo dare vita a un progetto che promuova i valori evocati dal vino, elemento che le nostre cantinette sono progettate per custodire e valorizzare.

Vinum Design is committed to creating solutions that allow people to live and share their spaces in an elegant, harmonious environment, one that conveys emotion to themselves, their families, and their guests.

WINE CELLAR CHOICE GUIDE

To choose the ideal wine cellar for your collection, consider its placement, storage capacity, the temperatures required for different types of wine, and whether it will be used in a domestic or professional setting. VINUMDesign offers a wide and versatile range to meet every need.

POSITIONING:

Vinum Design wine cellars are engineered exclusively for freestanding installation and offer a versatile, refined solution for wine preservation.

The range stands out for its ability to adapt to different settings: from design-driven solutions conceived for sophisticated living spaces, to multifunctional options for the kitchen, and up to the modular BigSize models, which can be combined to create custom compositions. This latter line is particularly suited to the Ho.Re.Ca. world, where functionality, capacity, and modularity are essential.

DIMENSIONS ?

Each Vinum Design wine cellar is accompanied by detailed dimensional specifications, conceived to support accurate planning and ensure a harmonious integration within any space. The measurements provided in the catalogue allow for a clear assessment of the actual footprint and help determine the ideal placement, whether in domestic environments or professional settings.

BOTTLE CAPACITY ?

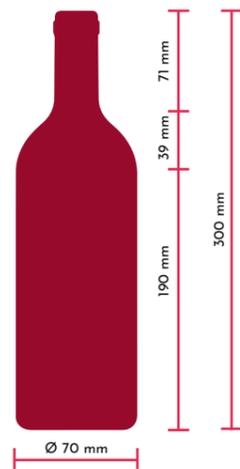

The maximum capacity is expressed in "Standard Bordeaux" bottles. The bottle count shown in the catalogue is based on the classic 750 ml Bordeaux bottle (H 300 mm, Ø 70 mm). Any other bottle type will affect the total capacity. Most wine cellars are equipped with solid-wood slatted shelves, all fully extractable and removable. This allows for additional space to accommodate larger formats, such as magnums, or bottles with unconventional shapes.

SINGLE OR DUAL TEMPERATURE ?

Vinum Design wine cellars are available in single-, dual-, or triple-temperature versions. The choice depends on your storage and serving needs: a single temperature is ideal for those who store one type of wine, while multi-zone models allow you to manage whites, reds, and sparkling wines simultaneously, maintaining optimal conditions in separate compartments. Each zone features its own temperature range, which should be checked for each model to ensure maximum precision and stability.

BOTTLE DIMENSIONS

STANDARD DRAWERS DESIGNED TO HOLD 750 ML BORDEAUX BOTTLES

Originally from Bordeaux (hence its name), it is used for both white and red wines. In the first case, it is almost always made of clear glass, while for red wines it is predominantly dark green.

FEATURES:

- Base: Slightly Pronounced
- Body: Cylindrical, Diameter 7-8 cm
- Shoulder: Highly Pronounced
- Neck: Short
- Capacity: 750 ml M

SOME TYPES OF BOTTLES

There are various types of bottles on the market, differing in both shape and size—from classic Bordeaux bottles to larger formats such as magnums. The VinumDesign wine cellar collection features configurable bottle-holding shelves designed to accommodate every bottle type intended for storage.

STRUCTURED AND AGE-WORTHY RED WINES

THE RIGHT TEMPERATURE

Every bottle tells a story, but only when stored correctly can it fully reveal its character. A VINUMDesign wine cellar is a conscious choice: a gesture of respect for the time, craftsmanship, and passion contained in every label. It shields the wine from light, temperature fluctuations, and humidity, creating a stable environment where each bottle can mature with elegance as it awaits its perfect moment.

STORING WINE AND SERVING WINE ARE NOT THE SAME THING.

Storage requires stability and protection, while serving temperature directly influences the sensory experience: if too high, the wine will appear unbalanced and overly alcoholic; if too low, its aromas and softness will be muted, emphasising acidity and tannins. Distinguishing between these two stages is essential to enhance every bottle at the moment of tasting.

RED WINES

Full-bodied red wines: 18°C
Standard red wines: 16°C | 18°C
Lively red wines: 16°C

ROSÉ WINES

Rosé wines: 14°C | 16°C

WHITE WINES

Full-bodied white wines: 12°C | 14°C
Standard white wines: 10°C | 12°C

SPARKLING WINES

Sparkling wines: 8°C | 12°C
Sweet sparkling wines: 8°C | 10°C

SWEET WINES

Sweet or passito wines:
12°C | 14°C

VINUMdesign®

BIG-SIZE WINE CELLARS

The Big Size wine cellar collection was created to meet the needs of the HO.RE.CA. sector. Its refined aesthetics, low energy consumption, compact dimensions, and meticulous attention to detail make Big Size wine cellars suitable for any environment, whether domestic or professional.

Every detail is carefully considered: from the compact proportions that make integration into any space effortless, to the low energy consumption that combines efficiency with sustainability, all the way to the meticulous attention devoted to finishes and materials. The result is a range of wine cellars that not only delivers professional-level performance, but also becomes a design element capable of enhancing the environment in which it is placed.

In every setting, these wine cellars stand out for their ability to transform wine storage into an experience of style and quality.

TOUCH DISPLAY AND LED LIGHTING

Big Size wine cellars deliver professional-grade performance thanks to the LED Touch Display and precise temperature control, adjustable from 3°C to 20°C. Available in single- or dual-zone versions, they are ideal for both domestic and professional use. The interiors are always perfectly illuminated by the white LED lighting, featuring dual full-height vertical light emission, ensuring that every bottle remains clearly visible at all times.

CUSTOMISABLE SHELVES ON TELESCOPIC RUNNERS

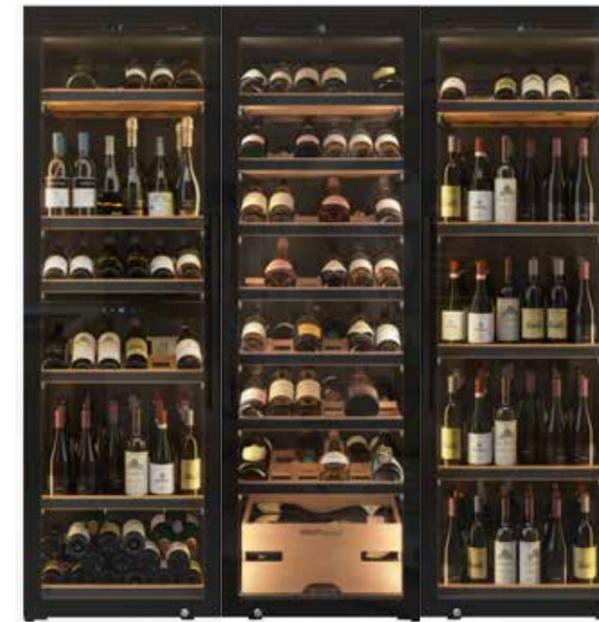

The internal shelves feature a black front strip that can be used to note, for example, the wine's origin, grape variety, or vintage. Using the supplied water-based marker, the writing on the strip can be easily erased. Thanks to the telescopic runners, the shelves slide out smoothly, making it easy to insert and remove bottles.

PROFESSIONAL PERFORMANCE

The new Big Size wine cellars can also be placed in living areas thanks to their exceptionally low noise level of just 38 dB. Equipped with Inverter compressors, they are not only quiet but also highly efficient, with reduced energy consumption of only 133 kWh/year and an F energy rating. Protecting a valuable wine collection is a serious responsibility, which is why Big Size wine cellars are equipped with a key lock.

H 180 cm

CONFIGURATION EXAMPLE:

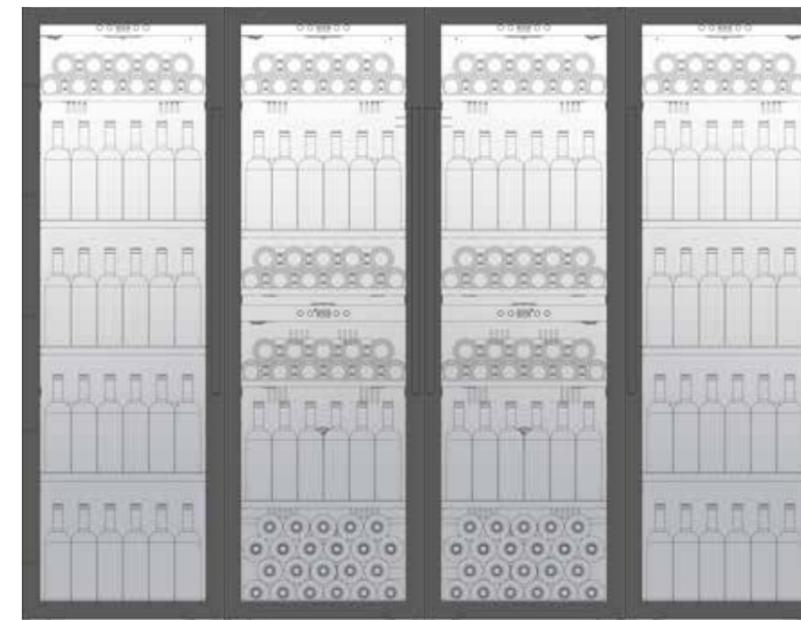

500 BOTTLES
Composed of three freestanding wine cellars installed side-by-side.

Wine cellar composed of:

- 1 NVD180-160D-BFG
- 1 NVD180-170S-BFG
- 1 NVD180-160S-BFG

Specifically designed to meet the demands of the HO.RE.CA. sector, the new Freestanding wine cellars maximise internal capacity, accommodating up to 160 Bordeaux-type 75 cl bottles.

With the new Big Size Wine Cellars, it is possible to create customised configurations by placing one or more units side-by-side, allowing you to design walls of the desired width and with the preferred number of temperature zones.

CONFIGURATION EXAMPLE:

640 BOTTIGLIE
6 TEMPERATURE
Composed of four freestanding wine cellars installed side-by-side. Total width 2.40 m

Wine cellar composed of:

- 1 NVD180-160S-BFG-L
